

**Getting beyond groove in worship planning –
"Pick a song, (not just) any song!"
Fred J. Heumann**

In the rush and pressure of planning, it is temptingly easy to just go with the new "hot" song, or to stick to our favorites. Even easier is to purely pick songs that fit our particular style or preference or just fit, period!

No matter what our service structure or focus, no matter what kind of time budget we have for worship songs, we as worship leaders have a pastoral responsibility to create services that really lead people into an encounter with God and into becoming growing followers of Jesus.

These 60-70+ questions are designed to stimulate your thinking as you plan for worship. Not all of them apply in every given situation, but cover points you will need to consider often. Always prayerfully allow the Holy Spirit to guide your decisions as you plan. Be sensitive to His leading both before and during the worship set. Be open to Him changing the agenda as well!
